How to Freewrite like a Pro

For this forum post, you're going to **freewrite** for ten minutes on things—activities, skills, talents, etc.—that you might be good at. This freewrite will help you as you start thinking about the first draft of WP#2. Set an egg timer or a timer on your phone for 10 minutes, and ***don't stop writing*** no matter what until the time goes off—don't worry about spelling errors, punctuation, or even complete sentences. Just write as much as you can in 10 minutes. When you're finished, spend some time revising and cleaning it up, and post it to the forum.
